

## *When There's a Fire in your Accounting System We Can Help Get it Under Control!*

*The part of Preventative Pooch is played by Molalla River Mollie,  
the Bennett/Porter Office Dog.*

Fires occasionally happen in your accounting software, and while we're really good at putting them out, we'd much rather help you in planning to prevent those fires.

MAS90 Level 4.0 is a good example of where planning needs to be done before the installation of 4.0 can occur. We've been testing Level 4.0 in the "real world" for several months and feel more comfortable now that we know where the potential flair-ups are. Because we're a Master Developer for Best Software (meaning we have Source Code for MAS 90), we have written our own utilities to prevent data from being purged out of the system (which could happen without the utilities!), as well as utilities to help us identify potential data problems before the upgrade. We've also re-written the General Ledger Detail report for Level 4.0, so it doesn't take as many pages to print as the standard Level 4.0 report does. While there are many reasons to upgrade to Level 4.0, we want to make sure it is a positive experience for you, and you don't get caught without the proper tools to perform your upgrade.

Give us a call today to schedule your pre-planning meeting to upgrade to Level 4.0. While we don't want to douse your enthusiasm, we also want to make sure we help you plan accordingly!
